

CATTLE Solutions

Animal Welfare is a source of performances

TONIFARM RANGE : Solutions based on plant extracts for breeding

Tonifarm F-R:

Hepatoprotective formula which improves liver and digestive functions. It should be given at the time of feed transitions, when zootechnical performances decrease after digestive diseases, and after antibiotic treatments.

Composition: Magnesium, Citrus and orange extracts, Organic silicium and selected Plant Extracts.

Tonifarm P-R:

Anti-stress formulation to improve the animal resistance in case of variations in temperature, environmental changes (new animals), animals rounding up and cold snaps.

Composition: Magnesium, Vitamin C, and selected Plant Extracts.

Tonifarm S-A-G:

To accompany the management of flu symptoms. It is advised at the time of variations in temperature, change in weather, viral diseases. It improves milk production just after parturition.

Composition: Magnesium, Vitamin C, Organic silicium and selected Plant Extracts.

POSTPARTUM:

Just after parturition, it contributes to improve genitalia hygiene, stimulate afterbirth elimination, accelerate uterus cleaning, boost lactation and contribute to a better future fertility.

Composition: Entire plants mixture, Flour by-product.

Complementary feed supplements
